Swasey School Playground

June 9, 2016

School officials were notified of the following objects being found on the Swasey School playground early this morning: a large knife, a lighter, a needle and syringe, and some empty CO2 containers, most likely used for an air gun, like a paint ball gun.

The Brentwood police were notified and they came to school to look over the playground and confiscated the items and they are now in the possession of the police.

School personnel will continue to walk our playgrounds each morning to be sure there are no dangerous items left from the previous day. The public has access to our playgrounds during after school hours and all summer long, and I wanted to be sure to alert all of our families and town residents of this occurrence. Please be sure to let your neighbors who may not have children at Swasey know of this occurrence. Thank you.

As always,

Ron W. Kew
Principal
